- ▫ Pentium II 233MHz or Higher
- ▫ RAM 32MB or Higher
- ▫ Free USB Port
- ▫ Available Internet Connection

# ➲ How to Work with Skype™:

**Run Skype**

- Download Skype software and install it (www.skype.com), the version must be 1.0.0.106 or higher.
- Run Skype and log in with Skype account.

You can create a Skype account as shown below:

After the software startup, the icon will appear to the system tray as shown below:

That indicates the Skype has successfully connected to Internet.

If it hasn't connected to Internet, the icon will be shown as 🖻, you have to check whether PC is connected to Internet successfully or not.
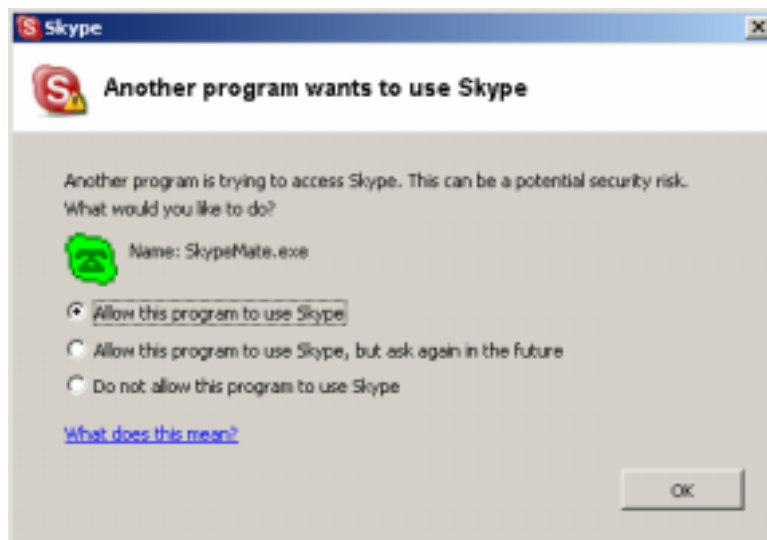

**Connect USB Telbox to PC**

- Connect USB Telbox to PC with USB cable in package, POWER indicator will be on.

- Plug PSTN line into "LINE" port.
- Connect phone to "TEL" port with the RJ11 cable enclosed in the package.

## Run Skyfree on CD

- Install the driver Skyfree from the CD enclosed in the package.

   The Skype program will pop up the window as shown below:

   Select the first item "Allow this program to use Skype", click "OK" button.

**Note:** If you selected the wrong item, you can execute "File->Options-> Privacy->
   Manage other programs' access to Skype->Change->OK" to open the window
   as above to make the correct selection again.

After running Skyfree, the icon will appear to the system tray as shown below:

   That indicates the device and Skype are connected successfully.

   If the icon is shown as 🕿, please run Skype first.

   If the icon is shown as 🕿, it means the USB Telbox is connected
   incorrectly, please reconnect USB Telbox to PC.

**Note:** When Skyfree startup, the default channel is PSTN.

## Channel Switch

   You can press "*" to switch PSTN channel to USB channel and vice versa.

## Make calls through USB

### Call another Skype user (PC to PC)

- Add a Skype mate to Contacts
- Assign Speed-Dial for it, for example "11"

- Input number and call out:

  Pick up the handset and then press "*" to change to USB channel, the "USB" indicator is on.

  Press digital "1" and "1" on the phone, this number will be shown on the addressbar in Skype window,

  Press "#" to call out.

  When you hang up the phone, the USB Telbox will switch to the PSTN (default) channel automatically.

**Call to regular phone (PC to Phone)**

  Pick up the handset and then press "*" to change to USB channel, the "USB" indicator is on.

  Pressing "00"+"country number"+"phone number"

  Press "#" to start the SkypeOut.

For Example: call to Taipei, Taiwan, press 00886212345678, then press "#".

| 00886 | 2 | 12345678 |
|--------------|----------|--------------------|
| country code | city code | telephone number |

**Note:** If you want to use this function, you should buy SkypeOut Credit first.

**Make calls through PSTN (Phone to Phone)**

Pick up the handset and dial the telephone number to call out.

**Note:** If the default channel is USB, you have to press "*" to change to LINE first.

**Answer a call**

When the phone is ringing on an incoming call, pick up the handset or press hand-free key to answer the call.

**Adjust options (volume and default channel)**

Double-click the [icon] on the taskbar, then you can adjust the volume and the default channel.
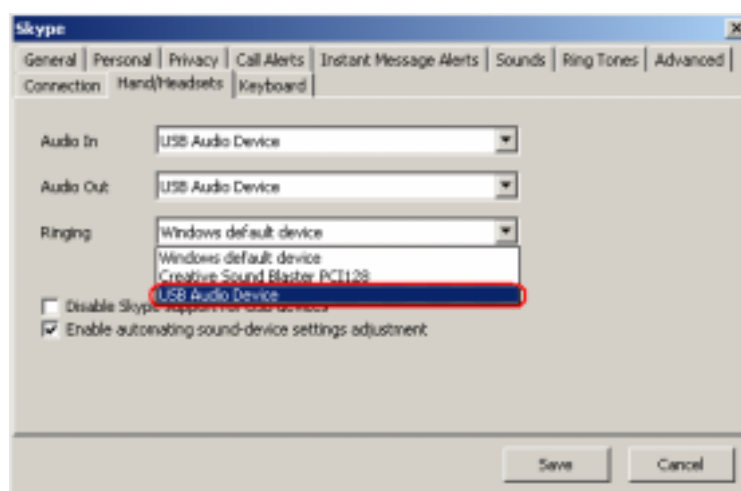

# ➲ **FAQ:**

**Problem 1**

The voice is coming through the PC's sound card instead of the phone when I make/answer a Skype call.

**Resolution**

Open the main window of Skype, click on "File->Options", and go to the table **Hand/headsets**, set **Audio In**, **Audio Out** and **Ringing** all to the **USB Audio Device**.
**Problem 2**

There is no voice coming out of speakers when playing music.

**Resolution**

Please execute the "Control Panel->Sound and Video ([icon])->Audio", set **Sound Playback** and **Sound Recording**'s Preferred device to your sound card, it is shown as below:

### Problem 3

Skype has been startup, but the icon of Skyfree still is shown as 🕿.

**Resolution**

Maybe you selected the wrong item, you can execute "File->Options->
Privacy-> Manage other programs' access to Skype->Change->OK" to open
the window as below, and select "Allow this program to use Skype".
